

**PRESS RELEASE**

## **ABEC, Inc. Establishes In-House Disposable Container Manufacturing for Custom Single Run™ Product Line**

**Bethlehem, PA USA – April 20, 2015**

ABEC, Inc. today unveiled manufacturing capability for single use Disposable Containers (DC's) to support its Custom Single Run™ (CSR™) product line. DC manufacturing is currently underway in an ISO-7 cleanroom. ABEC will be showcasing this capability at the annual Interphex show (Booth #3759) in New York City April 21-23.

Key benefits of the CSR™ product line include state-of-the-art process performance at scale and a lower risk DC supply strategy. In-house manufacturing capability enables efficient production of custom DC's that meet exact process requirements and full control of quality and lead times. The capability also supports ABEC's strategy of providing customers an unprecedented level of DC supply chain transparency and control.

Commenting on today's announcement ABEC's CEO Scott Pickering said: "ABEC's ability to provide custom manufacturing-scale solutions on multiple platforms – single use, multi-use, and hybrid – is unique in the industry. DC manufacturing capability significantly strengthens our ability to engineer, design, and deliver optimal solutions that meet our customers' overall business needs with respect to process performance, operational requirements, facility constraints, budgetary factors, and time to market."

### **About ABEC Inc.**

Since 1974, ABEC has been a leader in delivering integrated process solutions for manufacturing in the biopharmaceutical industry. Many of today's leading antibody, vaccine, and recombinant protein therapies are manufactured by processes and equipment engineered, manufactured, installed and serviced by ABEC, and a majority of the world's pharmaceutical and biotech companies are ABEC customers. ABEC's unique value is based on long experience, complete in-house capabilities, a custom, flexible approach, and long-term credibility. Whether building new capacity or improving existing facilities, ABEC's turn-key solutions reduce overall cost and time to market while delivering maximum productivity.
